

# Gateway Language Translation: Latin American Spanish

TOTAL NEEDED

\$400,000

\$55K - New Testament | \$162K - Old Testament  
\$2K per NT book | \$4K per OT book

With no open-licensed, easily-understandable Scriptures in either Latin American Spanish or any of the 552 local languages across Latin America, the Word of God remains locked to people in dozens of countries. Among them are 120 unreached people groups (UPGs).

unfoldingWord's Latin American Spanish GL Translation initiative (es-419) will enable new believers to be discipled and equip church-centric teams to begin translating the Bible into their heart language of Spanish.

**Over the next 12 months**, here's what we hope to see or accomplish:

- **Personal visits** with dozens of key organizational and church network leaders in Ecuador, Colombia, Guatemala, Mexico, Paraguay, Peru and Venezuela.
- **Translations** of translationAcademy, Creative Commons and five uW white papers.
- **Six church network leaders** deciding to engage themselves and their church networks in translation work and providing GL Strategy leadership.
- **Network leaders identifying** at least one member of their networks to be trained to be a trainer and demonstrating a willingness to fund the training of more people to do translation.
- The **review, revision, translation and approval** of more than 500,000 words of text into Spanish.

When these goals are accomplished, the 552 indigenous language groups across Latin America that have bilingual believers who speak Spanish will have the tools they need to translate God's Word into their own language!

*\* If funding needs for a project are met, unfoldingWord will assign donations to a similar project.*
